1997-02 C5 Mirror Mask

Important Instructions, Please Read Before Installation:

Preparation:

Wash and wax mirrors as normal.

Each Mirror Cover has a tag sewn inside that says **Driver** or **Passenger** on it.

Caution:

Mirror Covers, like nose masks, are for use as temporary protection for the paint on your mirrors. Take off of your car when not in use to allow the mask and your paint finish to dry and breathe.

Installation:

1. For the best fit make sure mirror covers are warm prior to installing to allow stretching. This can be done by setting in the sun on a warm day or carefully with a hair dryer. (If covers are not warmed up, they will appear to be too small.)
2. Open up the velcro fasteners of the **Driver Side Cover** and pull the cover over the mirror so that the part with the elastic cord is wrapped evenly around mirror opening. Some shifting may be necessary to align properly.
3. Make sure the part of the cover that fits around the **Yoke** of the mirror is matched up correctly. The part of the cover closest to the car will match the shape of how the mirror butts up against the car.
4. Snug the Cover around the Yoke area and secure with the velcro fasteners. (It may be necessary to re-adjust the tightness in this area as the cover warms up.)
5. Repeat for the passenger side.

Cleaning:

Vinyl material should be cleaned with a good vinyl conditioner during routine car maintenance.
